SUMMARY

Senior Software Engineer with 11 years delivering production systems across federal and private sectors. Currently at 4 Arrows Consulting building FEMA preparedness platforms in Spring Boot, Svelte, React, C#, and .NET. Experienced across the full stack in regulated, high-availability environments with a consistent focus on clean architecture and maintainable code.

CORE EXPERTISE

Backend: Java (Spring Boot), C# (.NET), Python (Django), REST APIs, MySQL, PostgreSQL, SQL Server, Flyway

Frontend: TypeScript, Svelte, React, Angular, GWT, Bootstrap, Tailwind

System Design: Microservices, API-Driven Design, Event-Driven Patterns, Distributed Session Management, Layered Systems

DevOps & Tools: Docker/Podman, Gradle, Maven, AWS (Lambda, S3), Git, Apache Tomcat

Platforms: Liferay 7, Node.js, npm, Cloudflare Workers & Pages

PROFESSIONAL EXPERIENCE

Senior Software Engineer | 4 Arrows Consulting, Inc. · Somerset, KY (Remote) 2019 – Present

- Built real-time presence tracking for the Unified Reporting Tool (URT), using session records, polling, and configurable timeout behavior to reduce accidental overwrite risk across concurrent federal users.
- Designed and built the Svelte frontend for a TypeScript monorepo of AWS serverless applications serving as a unified access portal for FEMA platforms including PrepToolkit, RTLT, RIS, and OneResponder.
- Automated enterprise reporting with Docmosis and Apache POI, cutting processing time from hours to minutes for national emergency preparedness programs.
- Delivered features across Spring Boot and .NET backends, MySQL, and Svelte frontends within the FEMA preparedness platform suite.
- Translated FEMA program requirements (THIRA/SPR, CPG, NIMS, UAWG) into technical solutions, coordinating with project leads to meet federal compliance and security standards.

Tech Stack: Java, Spring Boot, C#, .NET, Gradle, GWT, MySQL, Flyway, Liferay 7, TypeScript, Svelte, React, Node.js, AWS Lambda, API Gateway, CloudFront, Docker/Podman, Git

Applications Developer | United Parcel Service (UPS) · Louisville, KY 2017 – 2019

- Engineered backend logic and UI features for real-time transportation visibility systems in a 24/7 high-throughput production environment.
- Translated business requirements into discrete rules for the Drools inference engine (BRMS), decoupling policy from application code and reducing manual intervention.
- Identified and resolved critical latency bottlenecks under peak traffic through targeted performance analysis with JMeter.

Tech Stack: Java, Spring Framework, Maven/Gradle, Drools (BRMS), JMeter, WebLogic, ActiveMQ, SQL Server, TFVC

Software Developer | Apax Software · Lexington, KY

2016 – 2017

- Built reusable backend components and modular UI features across multiple client projects, helping teams ship without rebuilding the same foundations.
- Translated stakeholder requirements into production REST APIs for clients including Presbyterian Church USA and the University of Kentucky.
- Implemented server-side validation, authentication, and RBAC for sensitive event registration and CMS workflows.

Tech Stack: Python, Django, JavaScript (AngularJS, jQuery), PostgreSQL, Bootstrap, AWS, Git, PHP, Drupal**Programming Analyst | Knowledge Facilitations Group (KFG)** · Richmond, KY 2015 – 2016

- Developed Python-based transformation engines to validate and map disparate industry standards (X12, EDIFACT, XML, JSON) for seamless data exchange across the EDITRACE platform.
- Built real-time monitoring dashboards providing immediate visibility into automated EDI data pipelines, reducing troubleshooting time for critical processes.

Tech Stack: Python, EDI (X12, XML, EDIFACT, Tradacoms, JSON, IDoc), Bootstrap, Git**EDUCATION**

B.S. in Computer Science · Eastern Kentucky University, Richmond, KY

2015

Member, Upsilon Pi Epsilon Honors Society for the Computing and Information Disciplines
